

DATE: September 30, 2021

TO: Todd Wyett, Chairman
State Transportation Commission

FROM: Paul C. Ajegba
Director

SUBJECT: Waiver of Commission Approval

The projects and descriptions documented in Exhibit A, attached, are contracts between the Michigan Department of Transportation, local public agencies, rail, and passenger transportation. These contracts require approval of the State Transportation Commission (STC). The approximate 4-week delay if Commission approval were deferred to the next STC meeting of October 21, 2021, would result in a delay in transmittal of funds, jeopardize project schedules, and transportation services.

The projects and descriptions documented in Exhibit A-1 attached, will be let by the Michigan Department of Transportation on October 1, 2021. These projects require pre-approval as the engineers' estimates are over \$500,000. The approximate 4-week delay resulting if Commission pre-approval were deferred to the next STC meeting on October 21, 2021, would delay the transmittal of the contract documents to the low bidders, and jeopardize the construction schedules.

The projects and descriptions documented in Exhibit A-2, attached, were let by the Michigan Department of Transportation on September 3, 2021. The low bids received were more than 10% over the engineers' estimate, and therefore require approval by the STC. The approximate 4-week delay resulting if Commission approval were deferred to the next STC meeting on October 21, 2021 would delay the transmittal of the contract documents to the low bidders and jeopardize the construction schedule.

Thus, a waiver of the required Commission approval is requested, as provided in Commission Resolution 79-3, as amended, footnote F:

"If, in the opinion of the Director, the public interest requires that a certain contract be awarded or an agreement be executed prior to approval by the Commission, hereunder, the Director shall seek a waiver of the required approval from the Chairman of the Transportation Commission. If the request of the approval is verbal, the waiver shall be confirmed, in writing, within fourteen (14) days."

If the waiver is granted, the Department will proceed to execute the items noted above.

Director

The request for waiver of Commission approval of the above-mentioned item is approved.

Todd Wyett, Chairman

OFFICE MEMORANDUM

DATE: September 30, 2021

TO: State Transportation Commission

FROM: Jack Cotter, CPA, CGMA
Commission Auditor
Office of Commission Audits

SUBJECT: State Transportation Commission Agenda – Exhibit A
September 30, 2021

As information requested by the Commission, the Office of Commission Audits (OCA) notes in Attachment 1, the Schedule of Receivables Outstanding, that Exhibit A includes entities that owe the department funds exceeding \$20,000 for more than 120 days. Attachment 1 shows relevant information regarding the receivables as of September 28, 2021.

Also, Guidance Document 10044, *Michigan Department of Transportation (MDOT) Requests for OCA Attestation Engagements and Procedures Regarding the Processing of Independent Certified Public Accountant's Review Reports*, requires the department to process OCA independent certified public accountant's review reports within 120 days of issuance. As of September 28, 2021, Exhibit A does not include any entities for which auditor's reports were not processed within the required timeline.

SUBJECT: Justification Memo for Bid Acceptance in Excess of 10 Percent of Engineer Estimate

Letting Date: September 3, 2021

Project Description: 10.40 mi of hot mix asphalt cold milling and resurfacing and pavement markings on US-2 from Wildwood Drive to Brevort Lake Road and from the Cut River to Worth Road, Mackinac County.

Project Number: 49023-203752

Item Number: 2109 004

Low Bidder: Bacco Construction Company

Eng. Est: \$6,782,491.85 Low Bid: \$7,851,997.32 Difference: \$1,069,505.47 Percent: 15.77

The following shows the engineer's estimate and the proposed bids received for this project:

Engineer's Estimate	\$6,782,491.85
Bacco Construction Company	\$7,851,997.32
Payne & Dolan Inc.	\$7,967,076.91

EXPLANATION FOR DIFFERENCES

The low bidder had unit prices that varied from the normal range. The main items found to be bid higher than the engineer's estimate are hot mix asphalt mixes (4EML and 5EML), hand patching and earth excavation. This project has maintaining traffic and environmental date restrictions which limit productivity and time to complete the project on schedule. Work is allowed only Monday through Thursdays, and although the project is 10.40 miles long, work cannot begin on the easterly 4.5 miles until after July 15, 2022. These restrictions will cause the work schedule to be more inefficient and labor intensive than if the contractor could work consistently along the length of the project. These restrictions will cause equipment for paving operations to be remobilized, increasing the cost of the asphalt and hand patching items. Earth excavation will create a shallow ditch along portions of the project; however, the work is spread out in small amounts per station, increasing the cost of the excavation item. The estimator considered several factors when estimating this project but was unable to precisely predict the unit prices.

OVERALL CONCLUSION

As indicated in the above analysis, the low bid is over the engineer's estimate, due to maintaining traffic and environmental date restrictions, and work that is in small quantity spread over the 10.40-mile length of the project. This project received two bids of \$7,851,997.32 and \$7,967,076.91, which varied by only 1.47 percent. We believe that rejecting this bid and re-letting this project will not result in lower bids, and the low bid should be considered reasonable based on the factors discussed.

The Bureau of Development and the Newberry Transportation Service Center request that this project be awarded to the low bidder, based on the above conclusion.

SUBJECT: Justification Memo for Bid Acceptance in Excess of 10 Percent of Engineer Estimate

Letting Date: September 3, 2021

Project Description: Bridge reconstruction including deck replacement, backwall replacement, masonry plate replacement, pin and hanger replacement, partial cleaning and coating, structural steel repairs, silane treatment, substructure patching, slope paving replacement, partial sloped wall replacement, concrete surface coating and approach work on US-127 over Norfolk Southern Railroad and M-50, Jackson County.

Project Number: 38111-208868

Item Number: 2109 007

Low Bidder: Grand River Construction, Inc.

Eng. Est: \$6,279,884.41 Low Bid: \$7,821,367.35 Difference: \$1,541,482.94 Percent: 24.55

The following shows the engineer's estimate and the proposed bids received for this project:

Engineer's Estimate	\$6,279,884.41
Grand River Construction, Inc.	\$7,821,367.35
Anlaan Corporation	\$7,896,609.07
Toebe Construction LLC	\$8,280,140.80
Miller Bros. Const., Inc.	\$8,765,262.16
C. A. Hull Co., Inc.	\$8,801,808.90

EXPLANATION FOR DIFFERENCES

The low bidder had unit prices that varied from the normal range. The main items found to be higher than the engineer's estimate were minor traffic devices; structures, rehabilitation, remove portions and steel structure, cleaning, partial, type 4. These items were bid higher than normal due to coordination work and construction schedule. This project consists of bridge reconstruction work over a railroad. The risk of performing work on railroad property and coordinating with the railroad continually throughout construction likely led to increased costs for the major items of work. Additionally, work will be done during two different construction periods: crossover work and deck patching this fall with the remaining construction taking place in the spring. The project was likely bid higher than expected to help account for the multiple mobilizations of materials, equipment, and traffic control over these two periods. The estimator

considered these factors when estimating this project but was unable to precisely predict the unit prices.

OVERALL CONCLUSION

As indicated in the above analysis, the low bid is over the engineer's estimate because of railroad coordination and the construction schedule. This project received five bids, ranging from \$7,821,367.35 and \$8,801,808.90, which varied by 12.54 percent. The two lowest bids varied by just 0.96 percent. We believe that rejecting this bid and re-letting this project will not result in lower bids, and the low bid should be considered reasonable based on the factors discussed.

The Bureau of Development and the University Region Office request that this project be awarded to the low bidder, based on the above conclusion.

SUBJECT: Justification Memo for Bid Acceptance in Excess of 10 Percent of Engineer Estimate

Project Description: 7.57 mi of overband crack fill, single course chip seal, fog seal, and intermittent hot mix asphalt shoulder repair on M-66 from north of Cedar Street northerly to south of M-46 in the city of Stanton, Montcalm County.

Project Number: 59051-211032

Item Number: 2109 017

Low Bidder: Highway Maintenance and Construction Company

Eng. Est: \$890,118.23 Low Bid: \$1,007,689.33 Difference: \$117,571.10 Percent: 13.21

The following shows the engineer's estimate and the proposed bids received for this project:

Engineer's Estimate	\$ 890,118.23
Highway Maintenance and Construction Company	\$1,007,689.33
Fahrner Asphalt Sealers, L.L.C.	\$1,130,164.82
Pavement Maintenance Systems, LLC	\$1,140,843.46

EXPLANATION FOR DIFFERENCES

The low bidder had unit prices that varied from the normal range. The main items found to be bid higher than the engineer's estimate are shoulder, class II, cold milling, and hot mix asphalt approach. These items are low volume quantities spaced throughout the project for shoulder repairs. The intermittent locations create low production work, requiring more time and labor to complete and has increased the bid prices for these items. The estimator considered several factors when estimating this project but was unable to precisely predict the unit prices.

OVERALL CONCLUSION

As indicated in the above analysis, the low bid is over the engineer's estimate due to intermittent shoulder repairs spaced throughout the project limits. This project received three bids ranging from \$1,007,689.33 to \$1,140,843.46, which varied by 13.21 percent. We believe that rejecting this bid and re-letting this project will not result in lower bids, and the low bid should be considered reasonable based on the factors discussed.

The Bureau of Development and the Cadillac Transportation Service Center request that this project be awarded to the low bidder based on the above conclusion.
